

Forager 55

FORAGER 55 Forage Sorghum

- Medium-Early Maturity
- Superior drought tolerance
- High grain yields
- Excellent Standability

A new forage hybrid demonstrating the characteristics needed for northern forage producers!! **FORAGER 55** is medium early in maturity, with large grain heads, shorter in stature for greater standability. You can expect high tonnage with an excellent ratio for grain to foliage with excellent TDN content. **FORAGER 55** will normally reach heights of 6-7 feet, is heavy stalked and very leafy. Seeding rate is recommended at 6-8 pounds per acre in rows for silage. 12-15# per acre if solid seeding. **FORAGER 55** can also be utilized for grazing or as a hay crop. Crimping is recommended if cut for hay.
